

# SAFETY DATA SHEET

n-Octylamine  
10550

Version / Revision 4.01  
Supersedes Version 4.00\*\*\*

Revision Date 30-Nov-2020  
Issuing date 30-Nov-2020

## SECTION 1: Identification of the substance / mixture and of the company / undertaking

### 1.1. Product identifier

Identification of the  
substance/preparation

**n-Octylamine**

Chemical Name Octylamine  
CAS-No 111-86-4  
EC No. 203-916-0  
Registration number (REACH) 01-2119474880-31

### 1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses Intermediate  
Formulation  
Sealant  
Functional Fluids  
laboratory chemicals  
Uses advised against None

### 1.3. Details of the supplier of the safety data sheet

Company/Undertaking **OQ Chemicals GmbH**  
Identification Rheinpromenade 4A  
D-40789 Monheim  
Germany

Product Information Product Stewardship  
FAX: +49 (0)208 693 2053  
email: sc.psq@oq.com

### 1.4. Emergency telephone number

Emergency telephone number +44 (0) 1235 239 670 (UK)  
available 24/7

## SECTION 2: Hazards identification

### 2.1. Classification of the substance or mixture

This substance is classified based on Directive 1272/2008/EC and its amendments (CLP Regulation)

Flammable liquid Category 3, H226  
Acute oral toxicity Category 3, H301  
Acute dermal toxicity Category 3, H311  
Acute inhalation toxicity Category 4, H332  
Skin corrosion/irritation Category 1A, H314  
Serious eye damage/eye irritation Category 1, H318

# SAFETY DATA SHEET

n-Octylamine  
10550

Version / Revision 4.01

Target Organ Systemic Toxicant - Single exposure Category 3, H335  
Environmental hazard Aquatic Acute 1; H400  
Aquatic Chronic 2; H411  
M-Factor: 1 (self-classification)

## Additional information

For full text of Hazard- and EU Hazard-statements see SECTION 16.

## 2.2. Label elements

Labelling according to Regulation 1272/2008/EC and its amendments (CLP Regulation).

### Hazard pictograms

### Signal word

**Danger**

### Hazard statements

H226: Flammable liquid and vapour.  
H301: Toxic if swallowed.  
H311: Toxic in contact with skin.  
H332: Harmful if inhaled.  
H314: Causes severe skin burns and eye damage.  
H335: May cause respiratory irritation.  
H400: Very toxic to aquatic life.  
H411: Toxic to aquatic life with long lasting effects.

### Precautionary statements

P210: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.  
P233: Keep container tightly closed.  
P260: Do not breathe gas/mist/vapours.  
P273: Avoid release to the environment.  
P280: Wear protective gloves/protective clothing/eye protection/face protection.  
P301 + P330 + P331: IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.  
P321: Specific treatment: IF ON SKIN: Wash off with 3% acetic acid followed by large amounts of plain water for at least 5 min as a final step.  
P304 + P340: IF INHALED: Remove person to fresh air and keep comfortable for breathing.  
P305 + P351 + P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.  
P310: Immediately call a POISON CENTER/doctor.  
P391: Collect spillage.  
P403 + P235: Store in a well ventilated place. Keep cool.  
P501: Dispose of contents/container in accordance with local regulation.\*\*\*

## 2.3. Other hazards

None known

# SAFETY DATA SHEET

n-Octylamine  
10550

Version / Revision 4.01

**PBT and vPvB assessment** This substance is not considered to be persistent, bioaccumulating nor toxic (PBT), nor very persistent nor very bioaccumulating (vPvB)

## SECTION 3: Composition / information on ingredients

### 3.1. Substances

Component	CAS-No	REACH-No	1272/2008/EC	Concentration (%)
Octylamine	111-86-4	01-2119474880-31	Flam. Liq. 3; H226 Acute Tox. 3; H301 Acute Tox. 3; H311 Acute Tox. 4; H332 Skin Corr. 1A; H314 Eye Dam. 1; H318 STOT SE 3; H335 Aquatic Acute 1; H400 Aquatic Chronic 2; H411 M-Factor: 1 (self-classification)	> 99,0

For full text of Hazard- and EU Hazard-statements see SECTION 16.

## SECTION 4: First aid measures

### 4.1. Description of first aid measures

#### Inhalation

Keep at rest. Aerate with fresh air. Call a physician immediately. Symptoms of poisoning may develop many hours after exposure.

#### Skin

Wash off with 3% acetic acid followed by large amounts of plain water for at least 5 min as a final step. Immediate medical treatment is necessary as untreated wounds from corrosion of the skin heal slowly and with difficulty.

#### Eyes

Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Remove contact lenses. Immediate medical attention is required.

#### Ingestion

Call a physician immediately. Do not induce vomiting without medical advice.

### 4.2. Most important symptoms and effects, both acute and delayed

#### Main symptoms

shortness of breath, convulsions, cough, hypertensive effect.

#### Special hazard

Stomach perforation, Lung oedema.

### 4.3. Indication of any immediate medical attention and special treatment needed

#### General advice

# SAFETY DATA SHEET

**n-Octylamine**  
**10550**

**Version / Revision** 4.01

Remove contaminated, soaked clothing immediately and dispose of safely. First aider needs to protect himself.

Treat as an alkaline substance (similar to ammonia). If ingested, irrigate the stomach. Treat skin and mucous membranes with antihistamine and corticoids. In case of lung irritation, first treatment with cortisone spray. Symptoms may be delayed. Later control for pneumonia and lung oedema.

## **SECTION 5: Firefighting measures**

### **5.1. Extinguishing media**

#### **Suitable extinguishing media**

alcohol-resistant foam, dry chemical, carbon dioxide (CO<sub>2</sub>), water spray

#### **Unsuitable Extinguishing Media**

Do not use a solid water stream as it may scatter and spread fire.

### **5.2. Special hazards arising from the substance or mixture**

Under conditions giving incomplete combustion, hazardous gases produced may consist of:

carbon monoxide (CO)

carbon dioxide (CO<sub>2</sub>)

nitrogen oxides (NO<sub>x</sub>)

Combustion gases of organic materials must in principle be graded as inhalation poisons

Vapours are heavier than air and may spread along floors

### **5.3. Advice for firefighters**

#### **Special protective equipment for firefighters**

Fire fighter protection should include a self-contained breathing apparatus (NIOSH-approved or EN 133) and full fire-fighting turn out gear.

#### **Precautions for firefighting**

Cool containers / tanks with water spray. Water run-off and vapor cloud may be corrosive. Water run-off can cause environmental damage. Do not allow run-off from fire fighting to enter drains or water courses. Dike and collect water used to fight fire. Keep people away from and upwind of fire.

## **SECTION 6: Accidental release measures**

### **6.1. Personal precautions, protective equipment and emergency procedures**

For non-emergency personnel: For personal protective equipment see section 8. Avoid contact with skin and eyes. Avoid breathing vapors or mists. Keep people away from and upwind of spill/leak. Ensure adequate ventilation, especially in confined areas. Keep away from heat and sources of ignition.

For emergency responders: Personal protection see section 8.

### **6.2. Environmental precautions**

Prevent further leakage or spillage. Do not discharge product into the aquatic environment without pretreatment (biological treatment plant). Water runoff can cause environmental damage.

### **6.3. Methods and material for containment and cleaning up**

#### **Methods for containment**

Stop the flow of material, if possible without risk. Dike spilled material, where this is possible.

# SAFETY DATA SHEET

n-Octylamine  
10550

Version / Revision 4.01

## Methods for cleaning up

Soak up with inert absorbent material. DO NOT use combustible materials such as sawdust. Keep in suitable, closed containers for disposal. If liquid has been spilt in large quantities clean up promptly by scoop or vacuum. Dispose of in accordance with local regulations. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours).

## 6.4. Reference to other sections

For personal protective equipment see section 8.

## SECTION 7: Handling and storage

### 7.1. Precautions for safe handling

Further info may be available in the appropriate Exposure scenarios in the annex to this SDS.

#### Advice on safe handling

Avoid contact with skin, eyes and clothing. Wash hands before breaks and immediately after handling the product. Provide sufficient air exchange and/or exhaust in work rooms. Refill and handle product only in closed system.

#### Hygiene measures

When using, do not eat, drink or smoke. Take off all contaminated clothing immediately. Wash hands before breaks and immediately after handling the product.

#### Advice on the protection of the environment

See Section 8: Environmental exposure controls.

#### Incompatible products

strong acids  
oxidizing agents

### 7.2. Conditions for safe storage, including any incompatibilities

#### Advice on protection against fire and explosion

Keep away from sources of ignition - No smoking. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours). In case of fire, emergency cooling with water spray should be available. Ground and bond containers when transferring material.

#### Technical measures/Storage conditions

Keep containers tightly closed in a cool, well-ventilated place. Handle and open container with care. Handle under nitrogen, protect from moisture. Keep at temperatures between -1 and 38 °C (30 and 100 °F).

#### Temperature class

T3

### 7.3. Specific end use(s)

Intermediate  
Formulation  
Sealant  
Functional Fluids  
laboratory chemicals

For specific end use information see the annex of this safety data sheet

10550

Version / Revision 4.01

## SECTION 8: Exposure controls / personal protection

### 8.1. Control parameters

#### Exposure limits European Union

No exposure limits established

#### Exposure limits UK

No exposure limits established.

#### DNEL & PNEC

#### Octylamine, CAS: 111-86-4 Workers

DN(M)EL - long-term exposure - systemic effects - Inhalation	4,6 mg/m <sup>3</sup>
DN(M)EL - acute / short-term exposure - systemic effects - Inhalation	Hazard unknown (no further information necessary)
DN(M)EL - long-term exposure - local effects - Inhalation	26,85 mg/m <sup>3</sup>
DN(M)EL - acute / short-term exposure - local effects - Inhalation	53,7 mg/m <sup>3</sup>
DN(M)EL - long-term exposure - systemic effects - Dermal	0,65 mg/kg bw/day
DN(M)EL - acute / short-term exposure - systemic effects - Dermal	Medium hazard (no threshold derived)
DN(M)EL - long-term exposure - local effects - Dermal	High hazard (no threshold derived)***
DN(M)EL - acute / short-term exposure - local effects - Dermal	High hazard (no threshold derived)
DN(M)EL - local effects - eyes	High hazard (no threshold derived)

#### General population

DN(M)EL - long-term exposure - systemic effects - Inhalation	Hazard unknown (no further information necessary)
DN(M)EL - acute / short-term exposure - systemic effects - Inhalation	Hazard unknown (no further information necessary)
DN(M)EL - long-term exposure - local effects - Inhalation	Hazard unknown (no further information necessary)
DN(M)EL - acute / short-term exposure - local effects - Inhalation	Hazard unknown (no further information necessary)
DN(M)EL - long-term exposure - systemic effects - Dermal	Hazard unknown (no further information necessary)
DN(M)EL - acute / short-term exposure - systemic effects - Dermal	Hazard unknown (no further information necessary)***
DN(M)EL - long-term exposure - local effects - Dermal	Hazard unknown (no further information necessary)
DN(M)EL - acute / short-term exposure - local effects - Dermal	Hazard unknown (no further information necessary)
DN(M)EL - long-term exposure - systemic effects - Oral	Hazard unknown (no further information necessary)

n-Octylamine  
10550

Version / Revision 4.01

**DN(M)EL - acute / short-term exposure - systemic effects - Oral** information necessary)  
Hazard unknown (no further information necessary)

**DN(M)EL - local effects - eyes** Hazard unknown (no further information necessary)

## Environment

<b>PNEC aqua - freshwater</b>	0,0002 mg/l
<b>PNEC aqua - marine water</b>	0,00002 mg/l
<b>PNEC aqua - intermittent releases</b>	0,002 mg/l
<b>PNEC STP</b>	3,2 mg/l
<b>PNEC sediment - freshwater</b>	0,353 mg/kg dw***
<b>PNEC sediment - marine water</b>	0,0353 mg/kg dw***
<b>PNEC Air</b>	No hazard identified
<b>PNEC soil</b>	0,0702 mg/kg dw***
<b>Secondary poisoning</b>	No potential for bioaccumulation

## 8.2. Exposure controls

### Special adaptations (REACH)

Not applicable.

### Appropriate Engineering controls

General or dilution ventilation is frequently insufficient as the sole means of controlling employee exposure. Local ventilation is usually preferred. Explosion-proof equipment (for example fans, switches, and grounded ducts) should be used in mechanical ventilation systems.

### Personal protective equipment

#### General industrial hygiene practice

Avoid contact with skin, eyes and clothing. Do not breathe vapours or spray mist. Ensure that eyewash stations and safety showers are close to the workstation location.

#### Hygiene measures

When using, do not eat, drink or smoke. Take off all contaminated clothing immediately. Wash hands before breaks and immediately after handling the product.

#### Eye protection

Tightly fitting safety goggles. In addition to goggles, wear a face shield if there is a reasonable chance for splash to the face.

Equipment should conform to EN 166

#### Hand protection

Wear protective gloves. Recommendations are listed below. Other protective material may be used, depending on the situation, if adequate degradation and permeation data is available. If other chemicals are used in conjunction with this chemical, material selection should be based on protection for all chemicals present.

<b>Suitable material</b>	nitrile rubber
<b>Evaluation</b>	according to EN 374: level 3
<b>Glove thickness</b>	approx 0,55 mm
<b>Break through time</b>	approx 60 min
<b>Suitable material</b>	polyvinylchloride

# SAFETY DATA SHEET

n-Octylamine  
10550

Version / Revision 4.01

**Evaluation** Information derived from practical experience  
**Glove thickness** approx 0,8 mm

## Skin and body protection

Impervious clothing. Wear face-shield and protective suit for abnormal processing problems.

## Respiratory protection

Respirator with A filter. Full mask with above mentioned filter according to producers using requirements or self-contained breathing apparatus. Equipment should conform to EN 136 or EN 140 and EN 143.

## Environmental exposure controls

Use product only in closed system. If leakage can not be prevented, the substance needs to be suck off at the emersion point, if possible without danger. If recycling is not practicable, dispose of in compliance with local regulations. Inform the responsible authorities in case of leakage into the atmosphere, or of entry into waterways, soil or drains.

## Additional advice

Further details on substance data can be found in the registration dossier under the following link:  
<http://echa.europa.eu/information-on-chemicals/registered-substances>. For specific exposure controls see the annex to this safety data sheet.

## SECTION 9: Physical and chemical properties

### 9.1. Information on basic physical and chemical properties

<b>Appearance</b>	liquid
<b>Colour</b>	colourless
<b>Odour</b>	ammonia-like
<b>Odour threshold</b>	No data available
<b>pH</b>	11,8 (100 g/l in water @ 25 °C (77 °F)) DIN 19268
<b>Melting point/range</b>	2 °C (Pour point)
<b>Method</b>	DIN ISO 3016
<b>Boiling point/range</b>	178 °C @ 1013 hPa
<b>Method</b>	OECD 103
<b>Flash point</b>	58 °C @ 1013 hPa***
<b>Method</b>	ISO 2719
<b>Evaporation rate</b>	No data available
<b>Flammability (solid, gas)</b>	Does not apply, the substance is a liquid
<b>Lower explosion limit</b>	0,7 Vol %
<b>Upper explosion limit</b>	9,6 Vol %

#### Vapour pressure

Values [hPa]	Values [kPa]	Values [atm]	@ °C	@ °F	Method
0,81	0,081	0,00081	20	68	
~ 7	~ 0,7	~ 0,007	50	122	

**Vapour density** 4,46 (Air = 1) @ 20 °C (68 °F)

#### Relative density

Values	@ °C	@ °F	Method

Version / Revision 4.01

<b>Viscosity</b>	1,371 mPa*s @ 20 °C
<b>Method</b>	DIN 51562, dynamic
<b>Explosive properties</b>	Does not apply, substance is not explosive. There are no chemical groups associated with explosive properties
<b>Oxidizing properties</b>	Does not apply, substance is not oxidising. There are no chemical groups associated with oxidizing properties

## 9.2. Other information

<b>Molecular weight</b>	129,25
<b>Molecular formula</b>	C <sub>8</sub> H <sub>19</sub> N
<b>log Koc</b>	4,25 @ pH 5 - 7 calculated***
<b>Dissociation constant</b>	pKa 10,6 @ 23,5 °C (74,3 °F) OECD 112***
<b>Refractive index</b>	1,429 @ 20 °C
<b>Surface tension</b>	44,2 mN/m (0,28 g/l @ 20°C (68°F)), OECD 115

## SECTION 10: Stability and Reactivity

### 10.1. Reactivity

The reactivity of the product corresponds to the typical reactivity shown by the substance group as described in any text book on organic chemistry.

### 10.2. Chemical stability

Stable under recommended storage conditions.

### 10.3. Possibility of hazardous reactions

Hazardous polymerisation does not occur.

### 10.4. Conditions to avoid

Avoid contact with heat, sparks, open flame and static discharge. Avoid any source of ignition.

### 10.5. Incompatible materials

strong acids, oxidizing agents.

### 10.6. Hazardous decomposition products

No decomposition if stored and applied as directed. If heated to thermal decomposition the following decomposition products may occur depending on the conditions. carbon monoxide (CO). nitrogen oxides (NO<sub>x</sub>). cyanides. nitric acid. nitriles.

## SECTION 11: Toxicological information

### 11.1. Information on toxicological effects

**Likely routes of exposure** Inhalation, Eye contact, Skin contact, Ingestion

<b>Acute toxicity</b>				
<b>Octylamine (111-86-4)</b>				
Routes of Exposure	Endpoint	Values	Species	Method

## **Octylamine, CAS: 111-86-4**

### **CMR Classification**

The available data on CMR properties are summarized in the table above. They do not indicate a classification into categories 1A or 1B

### **Evaluation**

In vitro tests did not show mutagenic effects

Did not show reprotoxic or mutagenic effects in animal experiments

For carcinogenicity, no data are available\*\*\*

## **Octylamine, CAS: 111-86-4**

### **Main symptoms**

shortness of breath, convulsions, cough, hypertensive effect.

### **Target Organ Systemic Toxicant - Single exposure**

The available data lead to the classification given in section 2

### **Target Organ Systemic Toxicant - Repeated exposure**

Based on available data, the classification criteria are not met for:

STOT RE

### **Aspiration toxicity**

Due to the viscosity, this product does not present an aspiration hazard

### **Note**

Handle in accordance with good industrial hygiene and safety practice. Further details on substance data can be found in the registration dossier under the following link:

<http://echa.europa.eu/information-on-chemicals/registered-substances>.

## **SECTION 12: Ecological information**

### **12.1. Toxicity**

<b>Acute aquatic toxicity</b>			
<b>Octylamine (111-86-4)</b>

Version / Revision 4.01

## National regulatory information Great Britain

### Releases to air (Pollution Inventory Substances)

not subject

### Releases to water (Pollution Inventory Substances)

not subject

### Releases to sewer (Pollution Inventory Substances)

not subject

For details and further information please refer to the original regulation

## 15.2. Chemical safety assessment

The Chemical Safety Report (CSR) has been generated. For Exposure Scenarios see the annex.

## **SECTION 16: Other information**

### Full text of H-Statements referred to under sections 2 and 3

H226: Flammable liquid and vapour.

H301: Toxic if swallowed.

H311: Toxic in contact with skin.

H332: Harmful if inhaled.

H314: Causes severe skin burns and eye damage.

H318: Causes serious eye damage.

H335: May cause respiratory irritation.

H400: Very toxic to aquatic life.

H411: Toxic to aquatic life with long lasting effects.

### Abbreviations

A table of terms and abbreviations can be found under the following link:

[http://echa.europa.eu/documents/10162/13632/information\\_requirements\\_r20\\_en.pdf](http://echa.europa.eu/documents/10162/13632/information_requirements_r20_en.pdf)

### Training advice

For effective first-aid, special training / education is needed.

### Sources of key data used to compile the datasheet

Information contained in this safety data sheet is based on OQ owned data and public sources deemed valid or acceptable. The absence of data elements required by OSHA, ANSI or Annex II, Regulation 1907/2006/EC indicates, that no data meeting these requirements is available.

### Further information for the safety data sheet

Changes against the previous version are marked by \*\*\*. Observe national and local legal requirements. For more information, other material safety data sheets or technical data sheets please consult the OQ homepage ([www.chemicals.oq.com](http://www.chemicals.oq.com)).

### Disclaimer

**For industrial use only.** The information contained herein is accurate to the best of our knowledge. We do not suggest or guarantee that any hazards listed herein are the only ones which exist. OQ makes no warranty of any kind, express or implied, concerning the safe use of this material in your process or in combination with other substances. User has the sole responsibility to determine the suitability of the materials for any use and the manner of use contemplated. User must meet all applicable safety and health standards.

End of Safety Data Sheet

## Annex to the extended Safety Data Sheet (eSDS)

### General information

A quantitative approach used to conclude safe use for:

Environmental compartment

Long-term Systemic effects via inhalation

Long term local hazards via inhalation

Acute local hazards via inhalation

Long-term Systemic effects via skin

A qualitative approach used to conclude safe use for:

Acute systemic hazards via inhalation

Acute systemic hazards via skin

Long-term local effects via skin

Acute local hazards via skin

Local hazards via eyes\*\*\*

### Operational conditions and risk management measures

Wear protective gloves and eye/face protection

Skin coverage with appropriate barrier material based on potential for contact with the chemicals

Any measure to eliminate exposure should be considered

Containment of source except for short term exposure (e.g. taking sample)

Design closed system to allow for easy maintenance

If possible keep equipment under negative pressure

Control staff entry to work area

Regular cleaning of equipment and work area

Supervision in place to check that the RMMs in place are being used correctly and OCs followed.

Training for staff on good practice

Procedures and training for emergency decontamination and disposal\*\*\*

**Version / Revision** 4.01

PROC1: Use in closed process, no likelihood of exposure  
PROC2: Use in closed, continuous process with occasional controlled exposure  
PROC3: Use in closed batch process (synthesis or formulation)  
PROC4: Use in batch and other process (synthesis) where opportunity for exposure arises  
PROC5: Mixing or blending in batch processes for formulation of preparations and articles (multistage and/or significant contact)  
PROC8a: Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at non-dedicated facilities  
PROC8b: Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities  
PROC15: Use as laboratory reagent

## **Environmental release categories [ERC]**

ERC6a: Industrial use resulting in manufacture of another substance (use of intermediates)

## **Product characteristics**

Refer to attached safety data sheets

## **Processes and activities covered by the exposure scenario**

Use as an intermediate (not related to Strictly Controlled Conditions). Includes incidental exposures during recycling/ recovery, material transfers, storage, sampling, associated laboratory activities, maintenance and loading (including marine vessel/barge, road/rail car and bulk container).

## **Further explanations**

Industrial use

Assessment tool used:

Chesar 3.1

Product (article) characteristics

liquid

Assumes use at not more than 20°C above ambient temperature (unless stated differently)

Covers percentage substance in the product up to 100 % (unless stated differently)

Assumes an advanced standard of occupational Health and Safety Management System\*\*\*

## **Contributing Scenarios**

ventilation (5 to 10 air changes per hour) .

### Conditions and measures related to personal protection, hygiene and health evaluation

Wear chemically resistant gloves (tested to EN374) in combination with 'basic' employee training. Respiratory protection: 95 %.<sup>\*\*\*</sup>

**Number of the contributing scenario** 5  
**Contributing exposure scenario controlling worker exposure for PROC 14**

### Product characteristics

Covers percentage substance in the product up to 5 %

### Frequency and duration of use

8 h (full shift)

### Technical conditions and measures to control dispersion from source towards the worker

provide a good standard of controlled ventilation (5 to 10 air changes per hour) .

### Conditions and measures related to personal protection, hygiene and health evaluation

Wear suitable gloves tested to EN374. Respiratory protection: 95 %.<sup>\*\*\*</sup>

### Environment

PEC = predicted environmental concentration (local); RCR = risk characterisation ratio  
PEC = predicted environmental concentration (local+regional); RCR = risk characterisation ratio

Fresh Water (Pelagic)	PEC: 1.12E-4 mg/l; RCR: 0.562
Fresh Water (Sediment)	PEC: 0.08 mg/kg dw; RCR: 0.226
Marine Water (Pelagic)	PEC: 1.12E-5 mg/l; RCR: 0.56
Marine Water (Sediment)	PEC: 7.96E-3 mg/kg dw; RCR: 0.225
Agricultural Soil	PEC: 0.032 mg/kg dw; RCR: 0.451
Sewage Treatment Plant (Effluent)	PEC: 1.11E-3 mg/l; RCR: < 0.01

### Human exposure prediction (oral, dermal, inhalative)

Oral exposure is not expected to occur. EE(inhal): Estimated inhalative long-term exposure [mg/m<sup>3</sup>]; EE(derm): Estimated dermal long-term exposure [mg/kg b.w./d]. Exposure estimates are given for either short-term or long-term exposure depending on which lead to more conservative risk characterisation ratios. The RMMs described above suffice to control risks for both local and systemic effects.

Proc 8b	EE(inhal): 0.02; EE(derm): 0.137
Proc 10	EE(inhal): 0.016; EE(derm): 0.549
Proc 13	EE(inhal): 0.065; EE(derm): 0.274
Proc 14	EE(inhal): 0.081; EE(derm): 0.137

### Risk characterisation

RCR(inhal): inhalative risk characterisation ratio; RCR(derm): dermal risk characterisation ratio; total RCR= RCR(inhal) +RCR(derm). Where required local and systemic effects were evaluated both for short-term and long-term exposure. The RCR's given correspond in each case to the most conservative calculated values.

Proc 8b	RCR(inhal): < 0.01; RCR(derm): 0.211
Proc 10	RCR(inhal): < 0.01; RCR(derm): 0.844
Proc 13	RCR(inhal): < 0.01; RCR(derm): 0.422
Proc 14	RCR(inhal): 0.018; RCR(derm): 0.211

## Functional Fluids

### List of use descriptors

#### Process categories [PROC]

PROC8a: Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at non-dedicated facilities

PROC8b: Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities

PROC9: Transfer of substance or preparation into small containers (dedicated filling line, including weighing)

PROC17: Lubrication at high energy conditions and in partly open process

PROC18: Greasing at high energy conditions

PROC20: Heat and pressure transfer fluids in dispersive, professional use but closed systems

#### Environmental release categories [ERC]

ERC8a: Wide dispersive indoor use of processing aids in open systems

#### Product characteristics

Refer to attached safety data sheets

#### Processes and activities covered by the exposure scenario

Use as functional fluids e.g. cable oils, transfer oils, coolants, insulators, refrigerants, hydraulic fluids in professional equipment including maintenance and related material transfers

#### Further explanations

Professional use

Assessment tool used:

Chesar 3.1

Product (article) characteristics

liquid

Assumes use at not more than 20°C above ambient temperature (unless stated differently)

Assumes a basic standard of occupational Health and Safety Management System

Indoor use\*\*\*

## Contributing Scenarios

**Number of the contributing scenario** 1  
**Contributing exposure scenario controlling environmental exposure for ERC 8a**

#### Amounts used

daily wide dispersive use:  $\leq 5.5E-6$  to/d

Fraction of EU tonnage used in region: 0.1

#### Technical conditions and measures at process level (source) to prevent release

Release fraction to air from process: 100 %

Release fraction to wastewater from process: 100 %

Release fraction to soil from process: 0%

#### Conditions and measures related to municipal sewage treatment plant

The minimum grade of elimination in the sewage plant is (%): 91.09

**Number of the contributing scenario** 2  
**Contributing exposure scenario controlling worker exposure for PROC 8a**

#### Product characteristics

Covers percentage substance in the product up to 5 %

#### Frequency and duration of use

4 h (half shift)

#### Technical conditions and measures to control dispersion from source towards the worker

# SAFETY DATA SHEET

**n-Octylamine**  
**10550**

**Version / Revision** 4.01

provide a good standard of general ventilation (not less than 3 to 5 air changes per hour).

**Conditions and measures related to personal protection, hygiene and health evaluation**

Wear chemically resistant gloves (tested to EN374) in combination with 'basic' employee training. Wear respiratory protection (Efficiency: 90 %).

**Number of the contributing scenario** 3  
**Contributing exposure scenario controlling worker exposure for PROC 8b**

**Product characteristics**

Covers percentage substance in the product up to 5 %

**Frequency and duration of use**

4 h (half shift)

**Technical conditions and measures to control dispersion from source towards the worker**

provide a good standard of general ventilation (not less than 3 to 5 air changes per hour).

**Conditions and measures related to personal protection, hygiene and health evaluation**

Wear chemically resistant gloves (tested to EN374) in combination with 'basic' employee training. Wear respiratory protection (Efficiency: 90 %).

**Number of the contributing scenario** 4  
**Contributing exposure scenario controlling worker exposure for PROC 9**

**Product characteristics**

Covers percentage substance in the product up to 5 %

**Frequency and duration of use**
